Texas Well Owner Network

Pecos River Watershed

The Texas Well Owner Network (TWON) program is a free, one-day educational training for Texas residents who depend on household wells for their water needs. TWON is for private well owners who want to become familiar with groundwater resources, septic system maintenance, well maintenance, water quality and water treatment. Private well owners are independently responsible for monitoring the quality of their wells. Essentially, they are the operators of their own water system and are responsible for ensuring that their water is safe.

Bring your well water samples:

Well owners may bring water samples to the training to be screened for nitrate, total dissolved solids (TDS), as well as *E. coli* bacteria for \$10. Pick up approved sample bags and bottles with instructions at the Pecos, Reeves, Ward, Crane, Upton and Terrell County Extension offices. You may also pick up sample bags at the Middle Pecos Groundwater Conservation District. Bring your samples and payment of \$10 to the training on Oct. 22.

Pre-register for the workshop:
